

**Your Solar
Water Heating
Specialists**

A recognised leader in the New Zealand solar water heating industry, tested by the Energy Efficient and Conservation Authority of New Zealand Government and by an independent test organisation. With over 25 years experience Sola60 is New Zealand's choice for solar water heating.

Energy costs coming down - not likely! Fitting solar is easy and is a once only cost - the sun is an infinite source of free energy, forever.

State of the art German technology gives assured quality and top performance while a special electrostatically applied "selective surface" reduces radiant heat losses - energy will be contributed in overcast weather, and even in rain.

SOLA 60, SPECIALISTS IN SOLAR WATER HEATING, SUPPLY TO:

HOMES: New or Existing Homes - Solar Water Heating
